USER INTERFACE AND DESIGN

Task Analysis and User Flow – Food Ordering Application

Aim

To analyze the user interaction process in a food ordering application and represent it using a user flow diagram in Lucidchart.

User Flow Description

1. App Launch

- Start
- Open the app
- Enter/Confirm location
- Search “Pizza”

2. Restaurant & Food Selection

- View Restaurant List
- Select Restaurant
- View Menu
- Select Pizza
- Customize Pizza

- Add to Cart

3. Cart & Checkout

- Open Cart
- Review the Cart
- Checkout

4. Login Decision

- If not logged in → Log in / Sign up
- Confirm Address

5. Payment Process

- Select Payment Method
- Enter Payment Details
- Place Order
- Order Confirmation
- End

Conclusion

The experiment demonstrates how a structured user flow improves clarity and usability in a food ordering system. The decision point for login ensures authentication before payment, leading to a successful order completion.
